Heaters for the hot tubs				
IO01		Standard inside heater for a hot tub	Inside heater. A stainless steel (430) heater which has five culverts for the water circulation. Two chimney tubes and a roof. Power is 12-14 KW. Standard heater is suitable for 1.5 m and 1.9 m diameter hot tubs. Large heater is suitable for 2.2 m diameter hot tubs.	3995
IO02		Large inside heater for a hot tub		5295
OH02		Standard external wood burning heater for a hot tub	External wood burning heater. Power is 16 KW. An external heater will help you to save a space in the tub for at least two persons. External heaters are easier to stoke and clean. It is also easier to clean a tub if an external heater is selected.	6295
OH03		External wood-burning hot tub heater with a glass	Very powerful external wood burning heater for a hot tub. Power is 18 KW. Heater's size is 380x560x750 mm. Heater has the glass in the door, so it looks like a small fireplace. Partition before a chimney increases heater's performance. Water's in the hot tub heating time is about 2-3 hours in the summer and 3-4 hours in the winter.	6995
OH04		External 8 - corners wood burning heater	The external hot tub heater 15KW heats efficiently tubs with up 1.9 m diameter. The furnace is made of 2-3 mm high quality AISI 430 grade stainless steel, which a chromium content of 16 % gives better corrosion resistance and the grade is used in wide range of heaters. Heaters front is covered with heat resistant powder (up to 600 degrees). Heater's size is 500x550x680 mm.	5995

CF01		Wooden safety fence for a hot tub chimney	Safety fence is made from spruce wood. It allows to keep a proper distance from hot wood burning heaters.
CF02		Metal safety fence for a hot tub chimney	Safety fence is made from stainless steel. It allows to keep a proper distance from hot wood burning heaters.
